

SRP STRUCTURES

ISO 9001 : 2015 Certified

**Innovative Builds,
Timeless Strength**

ABOUT US

SRP Structures is a manufacturer of high-quality solar module mounting structures for the renewable energy industry. We design and produce durable, cost-effective solutions that ensure reliable performance and safety for solar installations. Serving residential, commercial, and utility-scale projects, our engineering-driven approach supports everything from small rooftops to large solar farms. With a Monthly production capacity of 1,800 metric tons, we deliver consistent quality and timely solutions for projects of all sizes.

VISION & MISSION

“Our Vision is to be a trusted and recognized company, known for quality, smart thinking, and honest work. We strive to make a positive impact wherever we operate by delivering reliable solutions, fostering strong relationships, and contributing to a sustainable future.”

“Our mission is to provide dependable and affordable solutions that customers can count on. We build lasting relationships by listening carefully, communicating clearly, and delivering consistent quality. Guided by honesty and responsibility, we are dedicated to earning trust every day and creating meaningful connections that endure.”

OUR COMMITMENT TO THE EARTH

Through innovative builds and timeless strength, we deliver high-quality structures that not only perform exceptionally but also reflect our unwavering commitment to preserving the Earth for future generations.

MANUFACTURING PROCESS WE FOLLOW

VALUE THAT PERFORMS

Easy Mechanical Design

Uncompromised Quality Standards

Competitive Pricing

Years of Reliability

Easy Installation

Technical Support

SRP STRUCTURES STRENGTH

High Speed Fully Automatic CU Roll Forming Machine

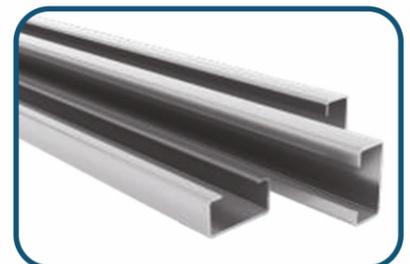

Technology at a Glance

Machine Speed up to 22 m/min

C Lip Purlin /CU Purlin Specification

FLANGE (mm)	30-80
WEB (mm)	50-250
LIP (mm)	8-20
THICKNESS (mm)	0.9-2.5

High Speed Fully Automatic Hat Roll Forming Machine

Technology at a Glance

Machine Speed up to 15 m/Min

Hat Purlin Specification

HEIGHT	60/70/80/90/100/110
WEB (mm)	40-80
LIP (mm)	20 & 25
SMALL LIP (mm)	7-16
THICKNESS (mm)	0.9 -1.6

Hat purlins play a key role in solar mounting structures by providing a reliable, economical, and easy-to-install solution for supporting solar panels. Their widespread use in the solar industry is mainly due to their balance of strength, durability, and installation convenience.

GROUND MOUNTED SOLAR STRUCTURES

TYPE OF STRUCTURES WE OFFERED:

- Fix Tilt Solar Structure
- Seasonal Tilt Structures

We design and manufacture ground-mounted solar mounting structures fabricated from cold- and hot-roll-formed sections, including CU Purlins, C-Lip, and Hat Purlins. Our structures meet MNRE specifications and deliver dependable performance for utility-scale and custom solar projects. Available in HDGI, Galvalume, and PosMAC.

CARPORT SOLAR STRUCTURES

Carport Solar Structures combine vehicle parking and solar power generation into a single, efficient solution. Designed for durability, aesthetics, and high performance, our solar carports transform unused parking areas into productive, revenue-generating assets.

SOLAR IRRIGATION PUMP STRUCTURE

Agriculture remains a vital sector in India, with solar-powered irrigation systems revolutionizing water access in rural and off-grid regions. Solar energy offers a reliable and cost-efficient solution for powering water pumps where electricity is limited.

SRP Structures delivers high-quality, durable solar mounting solutions designed for agricultural, domestic, and industrial applications. Our flexible systems can seamlessly integrate with existing utility power to extend pump operation and enhance water availability beyond daylight hours.

ROOFTOP SOLAR MOUNTING STRUCTURES

TYPE OF STRUCTURES WE OFFERED:

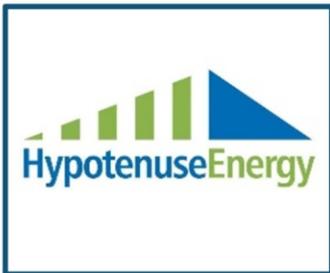

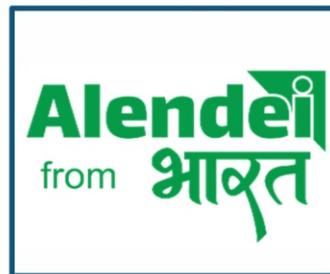

- RCC Rooftop Bolted Mounting Structure
- Tin Shade Mounting Structure
- Aluminium Solar Structure

We offer robust and easy-to-install pre-slotted rooftop solar structures, engineered in compliance with industry standards. Suitable for industrial and commercial applications, with material options in HDGI, Galvalume, and Aluminium.
